

✓ gene, do Fisher test

	Xfg hits	non-Xfg hits
Env 1	17	247
Env 2	6	46
Env 3	0	129

- Can also do whole GO categories instead of 1 gene at a time.

Then BH-correct ✓ Fisher tests

Yeast growth is harder: 3 variables: strain, env.
 3-dimensional Fisher test?

I need to decide: what are "signif genes" for yeast growth?
 Could follow Johnson 2021 mtls and find a $p=0.02$
 of eg. 6 hits to call it a multihit gene
